Education

Marmara University, İstanbul - Business Administration(UNCW)-Present

About My

Past

Hello, I am Ömer Özdemir, I started my education life at Marmara University in 2019. In addition to the English education, job opportunities and varieties of the department I chose, I aimed to improve myself and reach a good level with the UNCW program. Until this year of my education life, apart from the things I learned in classes, I participated in various activities and seminars and also played in my faculty's football team. These helped me develop both socially and in teamwork. However, I saw that there were differences between the education provided by my university outside of my preparatory period and what I aimed for, and in addition, my goal of going to the USA with the UNCW program remained incomplete due to the increasing exchange rate.

Present

In the summer of 2024, I decided to improve myself in the software field with my Python training, which I started long ago. I finished my Python training and decided that I wanted to focus on web development. Currently, I am continuing my school lessons and web development bootcamp and cs50 course training. And I hope that in addition to these trainings, I would like to participate in an internship to improve myself even more.

Future

I have already started working on my goals for the future and I am never taking a break. My long-term goal is to work on artificial intelligence and data science while working on a job in web development. In addition, instead of improving myself only in software or business life, I am also improving my social and people-reading skills day by day. In these times when it is difficult to find an honest and reliable employee or a friend, I aim to approach the given jobs with full dedication. I may not be the person you are looking for technically right now, but I know that I will be the best in the future thanks to this dedication.

Skills

HTML | CSS | Python | SQL | MongoDB | PyQt5 | Bootstrap | Styled-components | CSS Module | Git | PyQt5 | Matplotlib | Django | REST APIs | UI/UX | Responsive Design | Problem-Solving | Excel | Microsoft Project | Power BI

Projects

My Portfolio website [Link](#) | [Code](#)

- This website is my first project that I made with my front-end skills. Still working on it..
- I have built it using **Css, Html, Bootstrap**.
- It is dynamic and easy to use on web and also with **Mobile**.

Blog Website [Link](#) | [Code](#)

- I made this website while I'm studying on my python course.
- I have built it using **Css,Html,Bootstrap**.
